

Antibacterial **CLING WRAP**

Provides Protection Against Bacteria & Microbes
Helps to Keep the Food Safe & Fresh for Longer

Protector[®] Antibacterial Cling Wrap keeps the food safe & fresh for longer and reduces the chance of cross-contamination

Kills bacteria upon contact with the cling film

Keeps the freshness and nutrition of food

Avoids odor if keep different foods together

The ordinary cling film only limits the oxygen to the food items and can easily become contaminated with microorganisms. Usually, at super stores, different types of food are placed side by side at display that increase chances of cross-contamination among them.

A recent study by Food Standards Agency (FSA) confirmed that 73% of the chicken sold in UK market is contaminated with *Campylobacter* and 7% of the packaging found positive for *Campylobacter*.

Millions of people unknowingly risk their health every day by eating food that carries serious contaminants like pathogenic bacteria. Thousands of people fell seriously ill by consuming products that had been infected with dangerous bacteria such as *E. coli*, *Campylobacter*, *Salmonella* and *Listeria monocytogenes*. These microorganisms can cause fatal food borne illnesses like vomiting, cholera, dysentery, Listeriosis, salmonellosis, gastroenteritis and shigellosis to name a few. Meat, vegetables, fruits, bakery items, processed food and frozen items are more prone to bacterial contamination.

Product Specifications

Material: Polyethylene
Thickness: 10 micron

Retail Packs:

- 30 cm x 30 m (Approx. 100 sq. ft.), Core: 1"
- 30 cm x 60 m (Approx. 200 sq. ft.), Core: 1"
- 30 cm x 91 m (Approx. 300 sq. ft.), Core: 1"
- 30 cm x 152 m (Approx. 500 sq. ft.), Core: 1"

Commercial Rolls: 30 cm x 500 m,
(Approx. 1640 sq. ft.), Core : 3 "

Industrial Rolls: 30 cm x 500 m,
(Approx. 1640 sq. ft.), Core: 1 ½ "

* Customized sizes can also be available

In order to ensure the safe food supply and control the occurrence of diseases, Health & Hygiene Ltd, has developed Protector[®] Antibacterial Cling Film incorporating d2p Antibacterial Technology that provides an effective, long-lasting solution for protection against bacterial contamination. It helps to keep the food safe & fresh for longer and reduces the chances of cross contamination.

Its Antibacterial Efficacy is 99.99% tested by renowned independent labs in accordance with ISO 22196. The Antibacterial mechanism of Protector cling wrap prevents the bacterial contamination, and minimizes the risk of food wastage thus, keeping food safe, healthy and fresh.
